Canadian dairy industry changes prompts greater need for sanitary equipment

Due to a new pricing strategy, Canada has created a new category of milk called Class 7, which includes ultrafiltered milk. With a greater need for this type of milk, Canadian dairy producers must ensure their operations are prepared for increased production.

[Click here to learn what equipment is needed to meet the demands of an evolving milk market.](#)

Custom shell and tube heat exchangers help produce quality honey

According to the National Honey Board, most consumers look for liquid honey that has a bright, clear appearance. In order for manufacturers to meet these qualities, they must invest in the right processing equipment that can effectively filtrate and pasteurize the product.

[Click here to learn why shell and tube heat exchangers are an excellent option for the very temperature-sensitive, honey.](#)

Pharmaceutical

manufacturers must meet ASME-BPE standards

If your pharmaceutical manufacturing operations require new or upgraded shell and tube heat exchangers, it is essential to work with equipment fabricators who meet ASME-BPE's 10-part standards.
