

# WHEN SCHEDULE COUNTS.

Over 40-years of designing custom  
and off-the-shelf heat exchangers.

**ENERQUIP**  
Heat Exchangers

## Preventing cross contamination in your shell and tube heat exchangers

From working with quality equipment fabricators to understanding pressure differentials, find out ways you can reduce the chances of cross contamination in your food or pharmaceutical production facility.

## What you need to know about cleaning different tube configurations

When considering your options for a new shell and tube heat exchanger, one important factor is the tube configuration. Because fouling on both the shellside and tubeside is common, it is essential to understand different cleaning methods depending on the design of your heat exchanger.
