

INNOVATION IN DESIGN

Enerquip specializes in designing and building a diverse range of stainless steel process components for OEM systems, all while ensuring ASME Code compliance and adhering to your project timelines.

With our extensive industry experience, our team can either manufacture components based on your design or create custom solutions tailored to your specifications.

OUR SPECIALTIES

- **Sizes:** Up to 48" diameters (or larger depending on weight)
- **Weight:** Up to 40,000 lbs combined
- **Materials:** Carbon steel, 304L SS, 316L SS, Duplex, AL6XN, Hastelloy (our sanitary SS equipment is manufactured in our carbon-free facility in Medford, WI)
- **Standards:** ASME, PED, CRN

PAST PROJECTS

- Columns
- Exhaust stacks
- Pre-fabricated pipe spools
- Single shell tanks/pressure vessels

ADVANTAGES OF ENERQUIP'S CUSTOM FABRICATION

- **Design:** Experienced design engineering team with 2-D and 3-D capabilities
- **Machining:** In-house machining capabilities
- **Quality:** Stringent quality control process, including complete inspection and hydro-testing where applicable
- **Experience:** Experienced welders, fitters, assemblers, and finishers
- **Options:** Sand-blasting, electropolishing, or passivation available
- **Project management:** Proven project management processes keep your project on track
- **On-time delivery:** Reliable on-time shipping to your plant or jobsite
